*Obstructive Sleep Apena is a medical condition that tends to become more severe with time, and requires periodic re-evaluation by a qualified physician.

Oral Appliance Therapy (OAT) is less effective in controlling severe sleep apnea than C-PAP, and patient referred for this therapy may need to explore additional options of treatment if the appliance alone is deemed to provide suboptimal management of the sleep apnea. Copies of sleep studies with full report are required by Serenity Sleep Solutions for appropriate care and to obtain medical coverage.
